**FUEL CELL SYSTEM AND PROTECTION METHOD THEREOF**

Examiner: Scully    S.N.: 10/505,226    Art Unit: 1795    August 26, 2009

**DETAILED ACTION**

1. The Amendment filed June 3, 2009 has been entered. Claim 9 has been canceled and claims 1, 10, 16 and 27 have been amended. Accordingly, claims 1-8 and 10-17 are pending in the application.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bernard Codd on August 26, 2009.

The application has been amended as follows:

**In the Claims:**

In claim 10 at line 1, delete "10" after "in Claim" and insert "1".

***Claim Rejections - 35 USC § 102***

4. Claim rejections of claims 1-2, 5, 7-8, 11-12 and 14-17 under 35 U.S.C. 102(e) as being anticipated by Yoshizawa et al. (US2003/0162063) are withdrawn in light of the Amendment.

***Claim Rejections - 35 USC § 103***

5. Claim rejections of claims 3, 4 and 13 as being rejected under 35 U.S.C. 103(a) over Yoshizawa et al. variously in view of Schwoegler (US2001/0030624), Ito et al. (US4,513,808) and Bullock et al. (US2003/0082426) are withdrawn in light of the Amendment.

***Double Patenting***

6. Nonstatutory obviousness-type double patenting of claims 1-8 and 10-17 as being unpatentable over claims 1-27 of U.S. Patent No. 6,955,861 are withdrawn in light of the Amendment.

***Allowable Subject Matter***

7. Claims 1-8 and 10-17 are allowed. The following is an examiner's statement of reasons for allowance: The closest prior art of record is Yoshizawa et al. (US2003/0162063), wherein a fuel cell system comprising a water passage and a passage for gas required to generate power, a first protection device which prevents freezing of water in the fuel cell by maintaining the temperature of the fuel cell, a second

protection device which prevents freezing of water in the fuel cell by draining water in the fuel cell, and a controller functioning to select one of the first protection device and the second protection device as the protection device to be used when the fuel cell has stopped, and protect the fuel cell by operating the selected protection device when the fuel cell has stopped. See claim 1. Further, the controller functions to predict a restart time of the fuel cell based on past information relating to the start time of the fuel cell. See claim 15. Further, the controller functions to compute an energy required when the fuel cell is protected using the first protection device, compute an energy required when the fuel cell is protected using a second protection device, and select the one of the first protection device and second protection device which has the lesser required energy. See claim 18. Further, the controller functions to predict a variation in outside air temperature during the stop interval of the fuel cell. See claim 19. However, Yoshizawa et al., singularly or in combination with other prior art of record, do not disclose or suggest the system further comprising correcting the estimated restart time when the fuel cell is not restarted although a predetermined time after the estimated restart time has elapsed, and performing the protection mode selection again based on the corrected restart time, as is required by independent claims 1, 16 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
